MEDIA | Canson Cold Press, Watercolor, Micro Pen

SIZE | 8 x 10

By Kim Anderson

#FEBCHALLENGE19

Why would anyone ever want to take the longest, slowest, and obstacle-filled route when the fastest, smoothest and barrier-free route is available right in front of them? Using the visual route, Deaf babies, children, and adults will achieve and succeed throughout life a lot faster than using the auditorial route. Deaf eyes have rapid (100%) and immediate access to everything, no delays – especially to acquiring a language. As the auditorial sign warns, delays are guaranteed and expected throughout the route of life. Deaf ears are not meant to be fixed, don't waste time going that route! Take the most rapid, beautiful and accessible route – plenty of express lanes for everyone – it's the Super Eyeway!
