Reports from research, data, studies and consumer consumption on bilingualism have shown what the Deaf grassroots community have known all along. . . . having both ASL and English is far superior than having just one or the other. Bilingualism has greater benefits than monolingualism as shown in the "Consumer Report". As an adult, I am finally reaping the benefits of both that I was deprived of as a child. Why would anyone want to choose an inferior product? It may be cheaper or expensive depending on how the oppressive system values it and how to profit from it.
